

Cancer Surgery

Nephrectomy (Removal of a portion or all of a kidney)

Health Region	Actual Patient Waits for Procedures Performed 01-Jan-2010 to 30-Jun-2010						Patients Waiting on 30-Jun-2010
	Patients Completed	Within 3 weeks	4-6 weeks	7 weeks- 3 months	4-6 months	Longer than 6 months	
Saskatoon	45	18%	53%	29%	0%	0%	8
Regina Qu'Appelle	23	26%	35%	39%	0%	0%	7
Other Regions*	<5	Data suppressed because < 20 procedures performed					<5
Total†	71	23%	46%	31%	0%	0%	16

* Number of cases performed in other regions: Five Hills (<5);

† 90% of cases were performed within 56 days (8 weeks).

Notes

- This procedure is performed by urologists.
- Cancer surgery data is based on procedures performed in hospital operating rooms. 89% of all nephrectomies performed in operating rooms over this time period were categorized as cancer surgeries. Only cancer surgeries are included in this table.
- The data includes procedures that are performed for both invasive and slower growing cancers. 99% of nephrectomies reported as cancer cases were categorized as invasive with a target time frame of three weeks and the rest were categorized as slower growing cancers with a target time frame of three months. Emergency procedures and procedures performed for routine screening or scheduled follow-up are excluded. Some further work has to be done to ensure that the cancer categories are being consistently interpreted.
- Time periods where patients specify that they are unavailable for surgery are subtracted from the wait time.
- Postponed cases are included, regardless of whether the reason for postponement is patient or system-related.
- The results are based on the August 3, 2010 refresh of the SSCN Surgical Patient Registry data mart and are subject to minor changes as data is added or corrected.
